

Cutter X/Y Margins and Marks

A. Mark X Margin

B. Mark Y Margin

C. Image X Margin

D. Image Y Margin

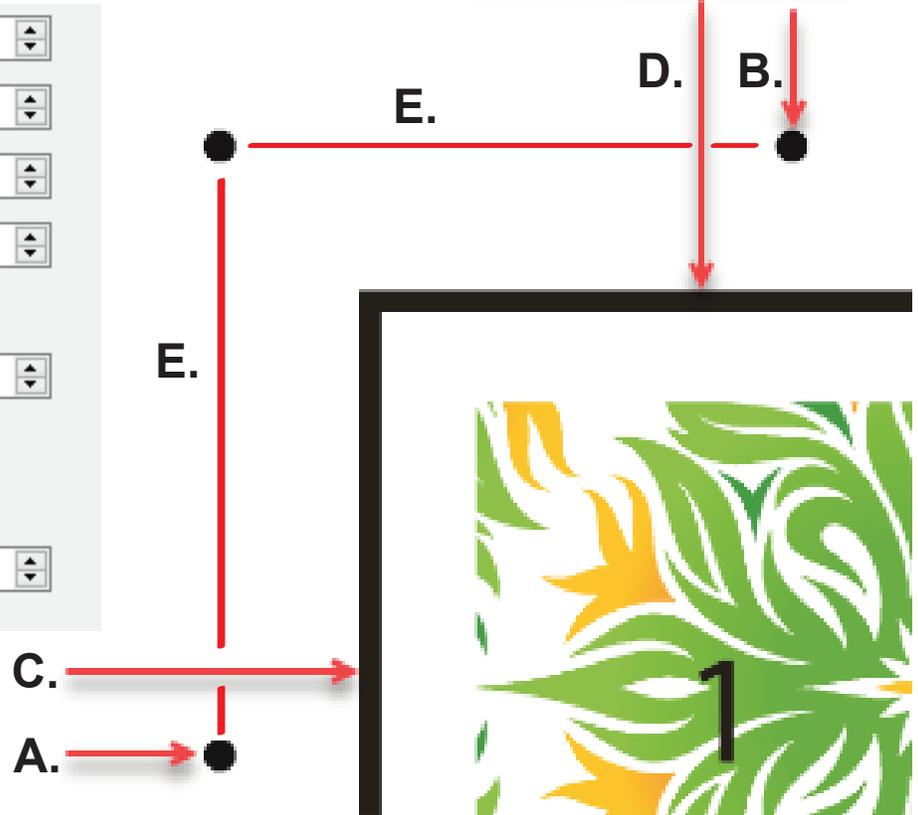

Print Intermediate X Marks

E. X Repeat Interval

Print Intermediate Y Marks

Y Repeat Between Each Row

Y Repeat Interval

A. Mark X Margin (Print/Scan direction)

Distance from the outside edge of the image border (or page) to the printed registration mark.

This affects both right and left marks

B. Mark Y Margin (Media advance direction)

Distance from the outside edge of the image border (or page) to the printed registration mark.

This affects both top and bottom marks

C. Image X Margin (Print/Scan direction)

Distance of border around the outside of the image. This is measured from the right/left of the page to the edge of the image.

This value allows for placement of cutter marks within the margin.

D. Image Y Margin (media advance direction)

Distance of border around the outside of the image. This is measured from the top/bottom of the page to the edge of the image.

This value allows for placement of cutter marks within the margin.

E. Print Intermediate Marks X and Y

This value allows intermediate registration marks to be added between the top/bottom marks (Y) and right/left marks (X)
